

## LC-MS Protein Scientist for our Service-Minded Characterization Team

Would you like to perform high-quality protein analysis services for biopharma clients all over Europe and USA – to help them develop novel biological drugs?

### Job description

We seek a new colleague with a PhD-level in protein chemistry/biomedicine/pharmaceutical science - or similar – to join our *characterization team*. The right person has significant hands-on experience in LC-MS recombinant protein characterization or proteomics.

You will work hands-on in our modern laboratory, manage own client projects, and actively collaborate with your team on development projects. After training, your tasks will include sample preparation, instrument responsibility, analysis using various LC methods coupled to mass spectrometry, data analysis, and reporting. The job also involves a great deal of contact to clients by email and at online meetings.

### Who are we?

We are a young, dynamic team, highly devoted to helping our clients and enjoy making our scientific experience applicable to the development of biologic drugs. We prioritize a work environment with a pleasant atmosphere, concurrent helpfulness and support, and emphasize flexibility and innovation. The goal is that it should be fun and fulfilling to go to work.

### Your skills and experience

You **must** have experience and an education in the following areas of protein analysis:

- LC-MS analysis of proteins or peptides.
- Protein purification, protein stability, and biophysical protein characterization.

Additional experience in one or several of these areas is an advantage:

- Analytical characterization of recombinant proteins, monoclonal antibodies, or gene therapy products.
- LC-MS instruments and software from Sciex and Bruker.
- MS and MS/MS spectra interpretation of proteins and peptides.
- Knowledge of PTMs analysis using LC-MS/MS.
- Statistical data analysis and Excel.

You have a friendly attitude with good collaboration and communication skills in English. You work systematically on multiple projects concurrently and thrive on new challenges. Proactive, service-minded, and team player are words describing your personality.

### Are you interested in learning more about this job opportunity?

Please send your application as soon as possible and no later than November 27<sup>th</sup>, 2022, to Ejvind Mørtz [mortz@alphalyse.com](mailto:mortz@alphalyse.com). Include a personal letter of motivation, your CV, and relevant diplomas with grades. Name 1-2 contact persons for reference. For more information about the position, contact Stine Thyssen at +45 6310 6507.

### About Alphalyse

*Alphalyse is a Danish contract research laboratory founded in 2002. We use our passion for protein analysis to help clients develop safe and effective medicines. An innovative and service-minded approach has made us world leaders in reproducible quantitative mass spectrometry analyses – by making data easy to understand and use and building strong relationships with clients.*

*We encourage a healthy work environment where you feel part of the team and are inspired to improve and innovate, with room to use and develop your skills. Learn more at [www.alphalyse.com](http://www.alphalyse.com)*
